Job description

job - There are no specific technology/Language requirements. But to date, most of our projects have been designed to be highly scalable and accurate. Some of our favorite solutions include:

- Implementation of Statistics/ML/DL for customer discovery and personalization
- Good Knowledge in **Machine Learning, Statistics, and Information Retrieval**
- Fluency in **Python (R is a plus)**, **Relational databases, SQL**
- ML libraries such as **Pandas, Numpy, Sklearn, Matplotlib and other data manipulation frameworks**
- DL Frameworks like **Tensorflow, Keras, Pytorch,**etc.

Impact - The algorithms designed by you will directly impact our more than 60 millions users worldwide**.** You will be open to explore different types of data and build deep learning models on top of it to enhance our existing recommendation engine. You can do impactful work with more than 1000+ people working together and impacting millions of lives through meaningful work, and generating high level growth revenue.

Fit- You are doing this not just for yourself and your family, but for a lot of people who are dependent on you for their lives. We are not hiring just hands but a complete human being with their emotions, humor, creativity, networking intent and integrity. These things matter more to us than deep domain-specific knowledge or highly developed skills in narrow areas.

Perks - We do not believe that we have to make any compromises to follow our heart. We take pride in providing world class facilities to our team members so that they solely focus on work. Here is a list of some of those facilities.

- Best-in-class salary as benchmarked with the market. There is no limit to our yearly hike %. Our best performers receive up to 100% hikes.
- We dont track vacation days and working hours. The company only measures what people get done; if employees do their work, It doesn't matter when or for how long they're in the office.
- Flat hierarchy. No ass-kissing. Equal growth opportunities for everyone.
- To make your job more fruitful than previous, the company also offers a professional development opportunity that can make this seemingly fantastical path a reality.
- We offer incredible perks focused on all employees single, parents and parents to be, everyone can get unlimited paid time off to bond with family members.

- In addition to standard health insurance benefits, we take care of its employees' and their family members' health.
- We encourage team members to bring their hidden talent in front of everyone. We highly encourage people to set personal goals and help them achieve them

Role: Fresher

Industry Type: Internet

Functional Area: IT Software - Application Programming, Maintenance

Employment Type: Full Time, Permanent

Role Category: Other

Education

UG :B.Tech/B.E. in Computers

Key Skills

Pytorch, Tensorflow, Matplotlib, R, Algorithms, Keras, Information Retrieva, lMachine Learning, Deep Learning, Numpy, SQL, Python.
